1. Complete

(i) the fraction shaded = —— = $\dfrac{3}{7}$

(ii) the fraction cut out = $\dfrac{3}{4}$ of $\dfrac{3}{7}$ = $\dfrac{3}{4} \times \dfrac{3}{7}$ = ——

2. Work out $\dfrac{2}{3}$ x $\dfrac{2}{5}$

3.   3. . . . .

4.   4. . . . .

5.   5. . . . .

6. Work out $\dfrac{2}{5} \div \dfrac{3}{7}$

7. (a) Work out $\dfrac{3}{4} \times \dfrac{1}{3}$

       Give your answer in its simplest form.

 (b) Work out $\dfrac{7}{8} \times \dfrac{4}{5}$

       Give your answer in its simplest form.

8. Work out $\dfrac{2}{5} \div \dfrac{6}{11}$

   Give your fraction in its simplest form.

9.   9. . . . .

10. Work out $3\dfrac{1}{3} \times 2\dfrac{3}{5}$
