

1. Rotate quadrilateral Q

(a) 270° clockwise about (1, 2) and label it A (b) 180° about (-6, 1) and label it B(c) 90° clockwise about (-4, 0) and label it C (d) 180° about (2, 1) and label it D(e) 90° anti-clockwise about the origin O {which is the coordinate (0, 0)} and label it E

1. Rotate quadrilateral Q

(a) 270° clockwise about (1, 2) and label it A (b) 180° about (-6, 1) and label it B(c) 90° clockwise about (-4, 0) and label it C (d) 180° about (2, 1) and label it D(e) 90° anti-clockwise about the origin O {which is the coordinate (0, 0)} and label it E

2. On the grid below, rotate parallelogram P 90° clockwise about (3, 1) and label it Q

2. On the grid below, rotate parallelogram P 90° clockwise about (3, 1) and label it Q
