example (a) $\dfrac{2.8}{7} = \dfrac{28}{70} = \dfrac{28}{7 \times 10} = \dfrac{4}{10} = 0.4$

example (b) $\dfrac{0.28}{7} = \dfrac{28}{700} = \dfrac{28}{7 \times 100} = \dfrac{4}{100} = 0.04$

example (c) $\dfrac{2.8}{70} = \dfrac{28}{700} = \dfrac{28}{7 \times 100} = \dfrac{4}{100} = 0.04$

example (d) $\dfrac{0.028}{7} = \dfrac{28}{7000} = \dfrac{28}{7 \times 1000} = \dfrac{4}{1000} = 0.004$

1. Work out the value of $\dfrac{0.9}{3}$

1. . . . .

2. Work out the value of $\dfrac{0.24}{6}$

2. . . . .

dec. $\times/\div$ (15) 1) 0.3   2) 0.04   3) 0.04   4) 0.03   5) 0.4   6) 0.02

example (a) $\dfrac{2.8}{7} = \dfrac{28}{70} = \dfrac{28}{7 \times 10} = \dfrac{4}{10} = 0.4$

example (b) $\dfrac{0.28}{7} = \dfrac{28}{700} = \dfrac{28}{7 \times 100} = \dfrac{4}{100} = 0.04$

example (c) $\dfrac{2.8}{70} = \dfrac{28}{700} = \dfrac{28}{7 \times 100} = \dfrac{4}{100} = 0.04$

example (d) $\dfrac{0.028}{7} = \dfrac{28}{7000} = \dfrac{28}{7 \times 1000} = \dfrac{4}{1000} = 0.004$

1. Work out the value of $\dfrac{0.9}{3}$

1. . . . .

2. Work out the value of $\dfrac{0.24}{6}$

2. . . . .

3. Work out the value of $\dfrac{0.2}{5}$

3. . . . .

4. Work out the value of $\dfrac{1.2}{40}$

4. . . . .

5. Work out the value of $\dfrac{3.6}{9}$

5. . . . .

6. Work out the value of $\dfrac{0.06}{3}$
