

1. (i) Complete the labels on the number line.

(ii) Which is larger $\frac{3}{4}$ or $\frac{5}{6}$?

1.

2. (i) Complete the labels on the number line.

(ii) Complete $\frac{2}{8} = \frac{\quad}{12}$

2.

fraction introduction (4) Q1 (ii) $\frac{5}{6}$ Q2 (ii) $\frac{4}{12}$ Q3 (ii) $\frac{5}{6}$ Q4 (ii) $\frac{3}{9}$

1. (i) Complete the labels on the number line.

(ii) Which is larger $\frac{3}{4}$ or $\frac{5}{6}$?

1.

2. (i) Complete the labels on the number line.

(ii) Complete $\frac{2}{8} = \frac{\quad}{12}$

2.

3. (i) Complete the labels on the number line.

(ii) Which is larger $\frac{4}{5}$ or $\frac{5}{6}$?

3.

4. (i) Complete the labels on the number line.

(ii) Complete $\frac{1}{3} = \frac{\quad}{9}$

4.

3. (i) Complete the labels on the number line.

(ii) Which is larger $\frac{4}{5}$ or $\frac{5}{6}$?

3.

4. (i) Complete the labels on the number line.

(ii) Complete $\frac{1}{3} = \frac{\quad}{9}$

4.
