(1) Work out $\frac{1}{3} - \frac{1}{12}$

Give your answer in its simplest form.

answers (8)

(1) Work out $\frac{1}{3} - \frac{1}{12}$

Give your answer in its simplest form.

.....

(2) Work out $\frac{1}{5} + \frac{3}{10}$

Give your answer in its simplest form.

1) $\frac{1}{4}$

(2) Work out $\frac{1}{5} + \frac{3}{10}$

Give your answer in its simplest form.

(3) Work out $\frac{5}{6} - \frac{1}{2}$

Give your answer in its simplest form.

2) $\frac{1}{2}$

(3) Work out $\frac{5}{6} - \frac{1}{2}$

Give your answer in its simplest form.

.....

(4) Work out $\frac{5}{6} - \frac{1}{3}$

Give your answer in its simplest form.

3) $\frac{1}{3}$

(4) Work out $\frac{5}{6} - \frac{1}{3}$

Give your answer in its simplest form.

.....

(5) Work out $\frac{1}{4} + \frac{7}{12}$

Give your answer in its simplest form.

4) $\frac{1}{2}$

(5) Work out $\frac{1}{4} + \frac{7}{12}$

Give your answer in its simplest form.

5) $\frac{5}{6}$
