

1. (i) Complete the teacher's Top Tips:

- a + sign drawn correctly can help you decide, if an angle is a right angle
- a right angle = degrees

(ii) Draw the right angle symbol on **all** the right angles shown below.

or Draw the right angle symbol on **all** the right angles in the shape below.

2. Write down the type of angles a, b, c and d.

You may use the + signs to help decide if the type of angle is acute, right, obtuse or reflex.

angle a

angle b

angle c

angle d

3. What kind of angle is angle u ? {OR v , w , x , a or b }

4. (i) Work out the value of $a/b/c$.
 (ii) Give a reason for your answer

5. (i) Work out the value of $x/b/x/a/y$.
 (ii) Give a reason for your answer

XYZ is a straight line.
 VYW is a straight line.

Is ABC a straight line?

6. (i) Work out the value of a/x .
 (ii) Give a reason for your answer

7. (i) Work out the size of the angle marked x/y .
 (ii) Give a reason for your answer

8. Work out the size of the angle CAB {or BCD or PQS or acute angle ACB}

Angle $BAD = 90^\circ$
 Angle $ABC = 68^\circ$
 Angle $ADC = 89^\circ$

PQR is a straight line.

SQT is a straight line.

Angle $PQT = \text{angle } SQR = 58^\circ$

9. Here is a regular polygon, a proportional triangle and an incomplete prime factor tree.

(i) Complete the labels of the exterior angles, e , and an interior angle, i , of the polygon.

(ii) Complete: number of sides, $n = \dots$

exterior angle, $e = \dots^\circ$

interior angle, $i = \dots^\circ$

{You may use the proportional triangle and prime factor tree}

10. Here is a regular polygon with 9 sides.

Diagram NOT accurately drawn.

Work out the size of an exterior angle.

11.

11. not written yet

12. (a)

(b)

Diagrams NOT
accurately drawn.

- (i) Work out the value of x .
- (ii) Give a reason for your answer
- (b) Faith says that triangle STU is isosceles.
Is she correct?
You must give a reason for your answer.
