1. Complete

(i) the fraction shaded = —— = $\dfrac{3}{7}$

(ii) the fraction cut out = $\dfrac{3}{4}$ of $\dfrac{3}{7}$ = $\dfrac{3}{4} \times \dfrac{3}{7}$ = ——

2. Work out $\dfrac{2}{3}$ x $\dfrac{2}{5}$

3.   3. . . . .

4. Work out $\dfrac{2}{5} \div \dfrac{3}{7}$

5. (a) Work out $\dfrac{3}{4} \times \dfrac{1}{3}$

   Give your answer in its simplest form.

   (b) Work out $\dfrac{7}{8} \times \dfrac{4}{5}$

   Give your answer in its simplest form.

6. Work out $\dfrac{2}{5} \div \dfrac{6}{11}$

   Give your fraction in its simplest form.

7.   7. . . . .

8. Work out $3\dfrac{1}{3} \times 2\dfrac{3}{5}$
