

1. This example shows the cover up method to find two points on the line $y = 3x + 5$

$$y = 3x + 5$$

the line

$$y = \text{☐} + 5$$

when $x = 0$

$$y = 3\text{▲} + 5$$

when $x = 1$

x	0	1
y	5	8

Complete this table for the line

$$y = 2x + 5$$

x	0	1
y		

2. Complete this table for the line

$$y = 3x - 1$$

x	0	1
y
