1. This example shows the cover up method to find two points on the line $y = 3x + 5$

$y = 3x + 5$ the line

$y = \square + 5$ when x = 0

$y = 3\blacktriangle + 5$ when x = 1

x	0	1
y	5	8

Complete this table for the line

$y = 4x + 1$

x	0	1
y		

2. This example shows the cover up method to find two points on the line $y = 3x + 5$

$y = 3x + 5$ the line

$y = \square + 5$ when x = 0

$y = 3\blacktriangle + 5$ when x = 1

x	0	1
y	5	8

Complete this table for the line

$y = 5x - 3$

x	0	1
y		

3. This example shows the cover up method to find two points on the line $y = 3x + 5$

$y = 3x + 5$ the line

$y = \square + 5$ when x = 0

$y = 3\blacktriangle + 5$ when x = 1

x	0	1
y	5	8

Complete this table for the line

$y = 6x - 1$

x	0	1
y		

Answers

1. 1, 5
2. -3, 2
3. -1, 5
