1. The angle between the vectors $\mathbf{a}$ and $\mathbf{b}$ is $54^{\circ}$

This pattern of equal angles between a line and parallel lines is called corresponding.
Draw the correct symbol on the angles corresponding to $\square$, and

2. The angle between the vectors $\mathbf{a}$ and $\mathbf{b}$ is $146^{\circ}$

This pattern of equal angles between a line and parallel lines is called corresponding.
Draw the correct symbol on the angles corresponding to $\boldsymbol{\square} \boldsymbol{\downarrow}$ and

3. The angle between the vectors $\mathbf{a}$ and $\mathbf{b}$ is $142^{\circ}$

This pattern of equal angles between a line and parallel lines is called corresponding.
Draw the correct symbol on the angles corresponding to $\square$, and $\boldsymbol{\Delta}$

4. The angle between the vectors $\mathbf{a}$ and $\mathbf{b}$ is $65^{\circ}$

This pattern of equal angles between a line and parallel lines is called corresponding.
Draw the correct symbol on the angles corresponding to $\square$, and
