

Use a CALCULATOR

1. Ghalib got 420 out of 500 in his coursework portfolio.

Write 420 out of 500 as a percentage.

2. Neil goes to the gym for one hour.

He spends 21 minutes on the weight machines.

What percentage of his gym session is spent on the weight machines?

3. Charlene is beginning her revision programme.

The table below shows her time plan for one day.

Sleep	9 hours
Meals and breaks	2 hours
Socialise	2 hours
Revise	3 hours
School	7 hours
Homework	1 hour

Calculate the percentage of day that she spends sleeping.

4. Rhys conducts a survey.

He asks 75 people about the snacks they ate yesterday.

15 of the people said they ate some crisps yesterday.

Calculate 15 out of 75 as a percentage

Answers: 1) 84 %   2) 35 %   3) 37.5%   4) 20%
