

1. Will be a sample question for this strand {With notes for the teacher added here}

2. If there are a number of different types of question within the strand
 - (a) Then each part will show an example of each type of question
 - (b) This is used when questions that look different
 - (c) Use almost exactly the same maths skills
 - (d) So students focus on the content as a way of recognising questions
 - (e) And don?t miss out questions, that they can do, but didn?t realise they could.

3. The centre of the header states how many strands are within the topic
{in this case 3 strands}
