

The approximate conversion rate to change gallons into litres is

$$1 \text{ gallon} = 4.5 \text{ litres.}$$

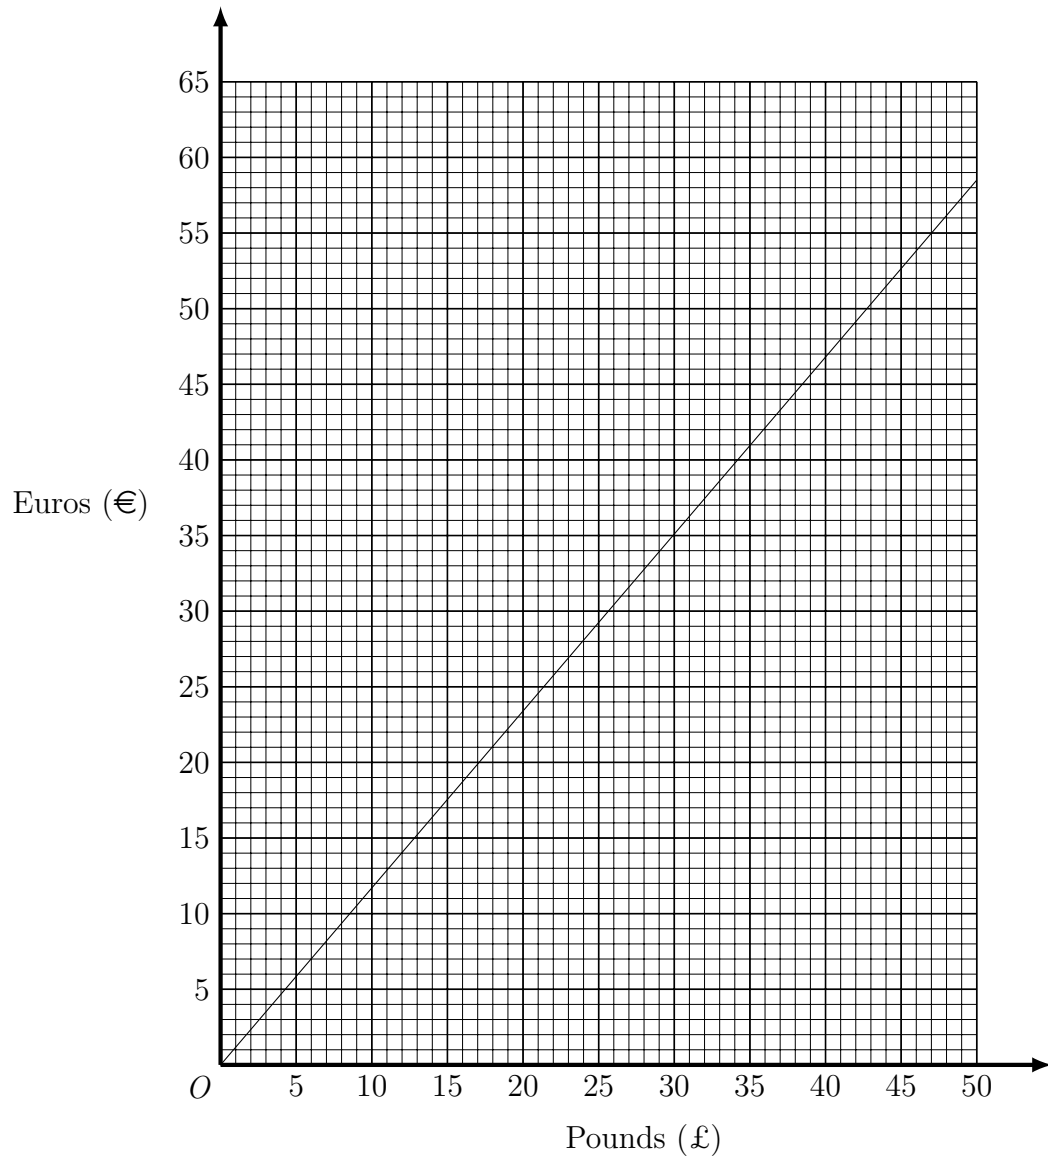

1. (a) (i) Use this approximate conversion rate to complete this table

gallons	0	2	4	6	8	10	12	14	16	18	20
litres	0	9									

- (a) (ii) On the grid, draw a conversion graph to change between kilograms and pounds.

This graph can be used to change between pounds (£) and Euros (€).

strand 1 (b) Use the graph to change £33 into Euros

2. Use the graph to change €46 into pounds.
