

1. Some multiples of 10 are easier to half than others.

Complete the calculations in these boxes.

2. Learn a way to work out half of the harder multiples of 10 by completing these boxes.

(a) To work out half of 30 you can write down $\text{half of } 20 = \dots$
 and then write down $\text{half of } 10 = \dots$
 and then add them to find $\text{half of } 30 = \dots$

(b) To work out half of 50 you can write down $\text{half of } 40 = \dots$
 and then write down $\text{half of } 10 = \dots$
 and then add them to find $\text{half of } 50 = \dots$

(c) To work out half of 70 you can write down $\text{half of } 60 = \dots$
 and then write down $\text{half of } 10 = \dots$
 and then add them to find $\text{half of } 70 = \dots$

(d) To work out half of 90 you can write down $\text{half of } 80 = \dots$
 and then write down $\text{half of } 10 = \dots$
 and then add them to find $\text{half of } 80 = \dots$ Turn over
